DESCRIPTION

Micro is an eco-sensitive surfacing material formed from recycled glass and other proprietary materials in a cementitious binder. This composite material contains up to 74% pre-consumer recycled content and is manufactured in Raleigh, North Carolina. All glass is 100% recycled and extracted from within 500 miles of Meld's manufacturing facility. Micro is an environmentally friendly alternative surfacing material to natural stone and petroleum based building materials.

SLABS SIZES

Standard slab sizes are 30" x 96" x 1-1/2" thick.
Custom slab sizes are available.

COLORS

Six (6) standard colors are available.
Custom colors are available.

ADDITIONAL APPLICATIONS

In addition to countertops micro™ can be used for table tops, wall panels, display tops, backsplashes, surrounds, sinks, tubs, furniture, fixtures, and high transit flooring for private residential and commercial spaces.

FABRICATION

Micro can be fabricated using standard stone/quartz tooling and machinery. Please refer to Meld's Fabrication Guidelines for further fabrication information. Please contact CaraGreen at 919.929.3009 or Meld USA to locate an experienced Micro fabricator in your region.

AVAILABILITY

Micro slabs are available through local countertop fabricators, Meld's distribution partner CaraGreen, LLC (east coast to mid sections of the US) or directly through Meld USA (west coast to mid sections of the US). Stocked slabs are available to ship within one to two days. Out of stock slabs will ship in 3-4 +/- weeks depending on the size of the order. Custom colors and slab sizes have an estimated 4-6 +/- week lead-time depending on the size of the order and from receipt of approved color.

SEALANTS

Micro products should be sealed with VOC compliant sealers. Your local Micro countertop fabricator should be able to recommend a suitable sealer based on the intended application. Please keep in mind that sealed surfaces are stain resistant but not stain-proof therefore all spills should be wiped up as quickly as possible.
