Printed in the USA on recycled paper that
contains 100% post consumer waste.

Richlite® Cascade Paper Composite Surface Materials

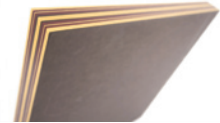

The Cascade Mountain Range is the quintessential backdrop of the Pacific Northwest and the inspiration for Richlite Company's new line of layered products. Rainier, Shasta, Adams, Hood, Little Tahoma and Baker are the six tallest peaks and represent Richlite's "Cascade Range."

Customize

Richlite's Cascade products come in six color variations featuring multi-color edges for progressive design tastes. If the six tallest peaks in the Cascades aren't your style, add your own look and feel with customized layering. Contact your regional distributor or dealer for complete details.

Sustainable

All Richlite materials, including the Cascade collection, are made with either FSC-Certified or post-consumer recycled paper. In addition, Richlite products are GREENGUARD certified for indoor use in residential, school and institutional environments and contribute to LEED points.
